

# ROBOTIC PROCESS AUTOMATION

# Precio Fishbone

Process Automation

Digital collaboration

Application development

## Our approach is practical

Precio Fishbone are 260 employees in five countries, we have been digitalizing manual work for 20 years with innovative applications and products. RPA is one of the central ways we see that customers can digitize work quickly and cost efficiently.

# Benefits of RPA

## Robotic Process Automation

A software robot mimicks the work that an employee would normally do

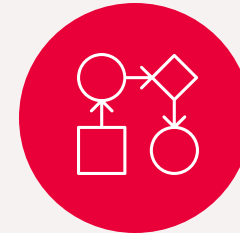

It makes decision based on defined rules and handle exceptions

It Integrates seamlessly with existing applications by logging in as employees would do

## Benefits in finance

Transform and automate existing processes, without expensive IT projects

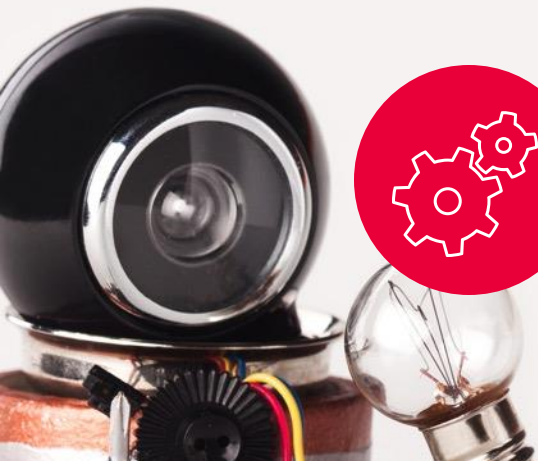

Improve service for internal and external customers

Reduce costs for handling compliance and risks

Enhance employee satisfaction by removing repetitive work

## Special offer - POC

The digital employee can do:

- Invoicing
- Payments
- Reconciliation
- Reporting
- Logistics
- Customer, supplier onboarding
- ...

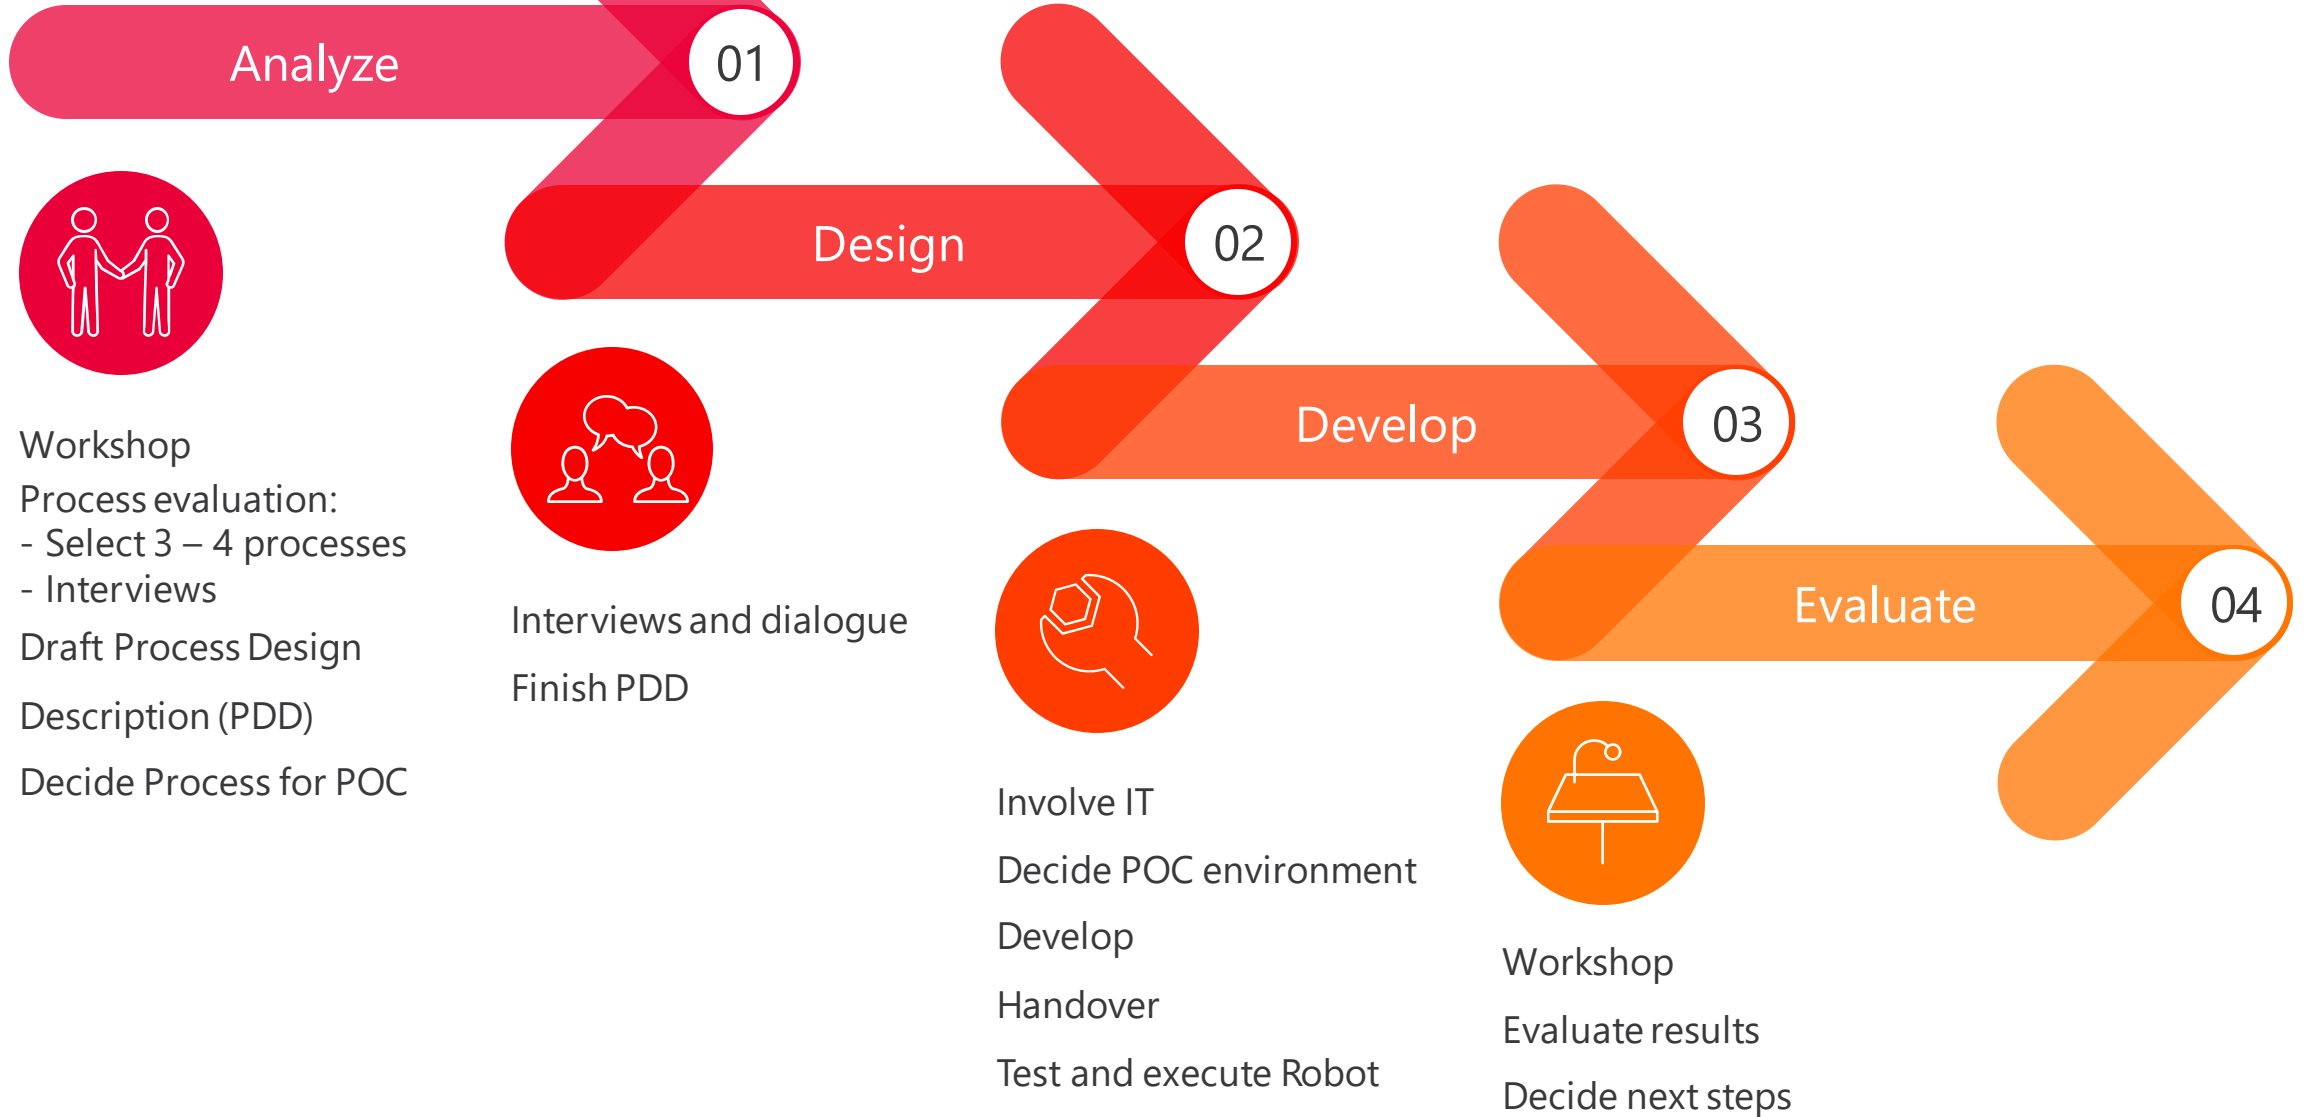

### Try RPA on an existing processes to evaluate potential

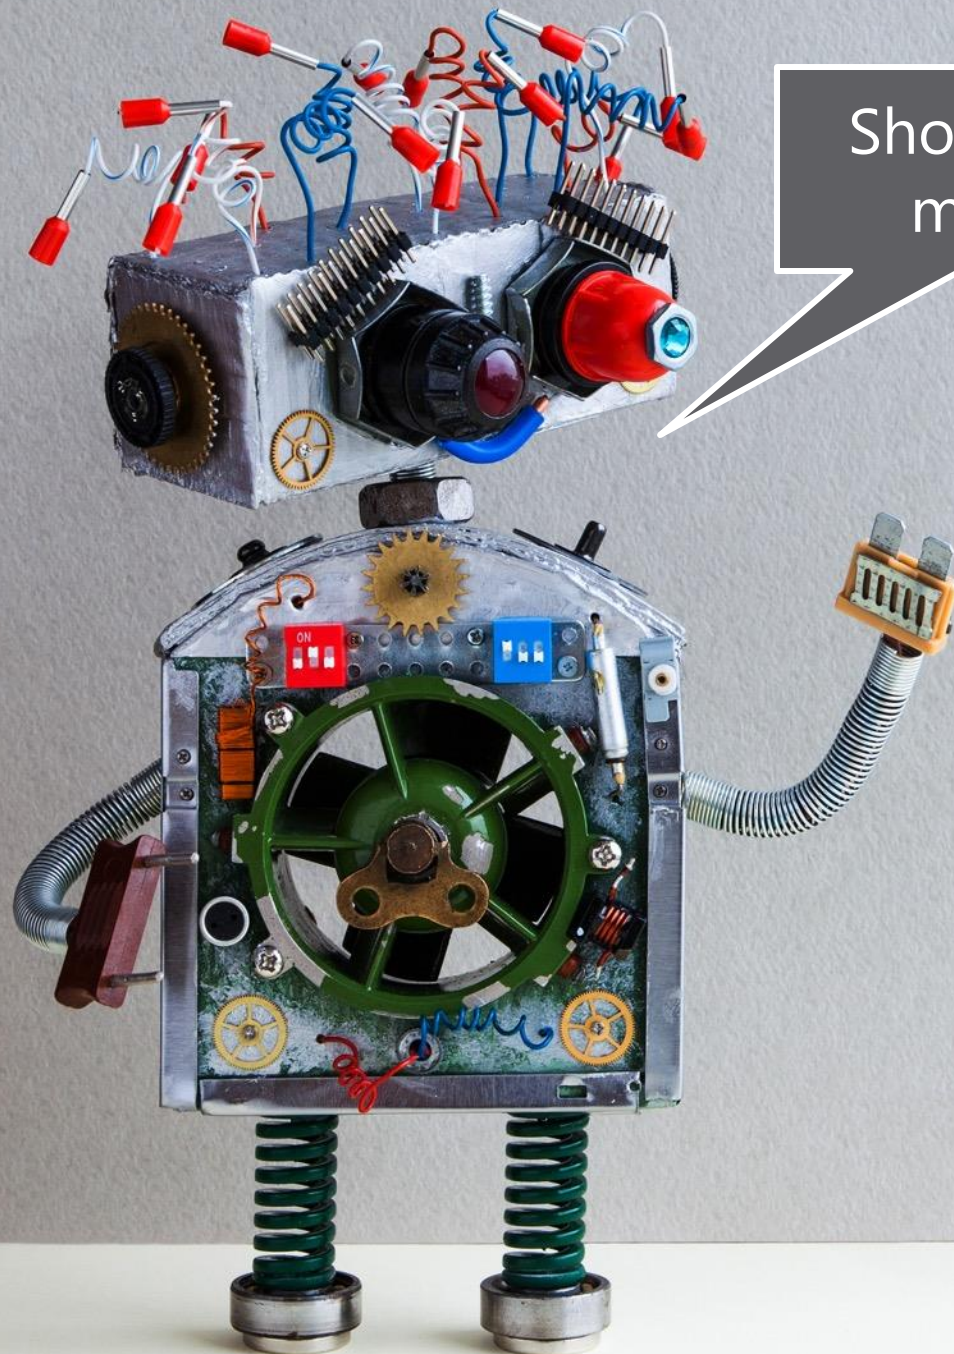

- Workshop to identify process candidates
- Detailed process description
- Development in RPA with UiPath\*

Fixed Price  
**49.000**  
**DKK**

\*No license required

# Proof of Concept process

Should we  
meet?
